COXEY SEES "CONSPIRACY."

General Says Railroad and Money Trusts Are Involved.

That there is a widespread conspiracy to force down the value of railroads and the price of labor on the part of the "money trust" and the "railroad trust" was the declaration of "Gen." Jacob S. Coxey, in an address at Pythian Temple last night. The one-time leader of "Coxey's army"

contended that the general public has

been made "sheep" for the shearers of the interests through unjustified inflation of railroad stocks, which now are being depreciated in value in order that they may be bought back by the financlers at greatly reduced figures. The price of labor and of railroad equipment has been forced down by the in-terests, according to "Gen." Coxey, by cutting down their orders for equipment, thus compelling the manufacturers to run smaller forces and to accept lower prices for their products.
